

## Appendix 2 for all Bring Company.

### Version: 1.1 – May 2015

Brings D04A BIG 14 supports all Bring company an theres TMS system. Exceptions are Bring Express Courier and distribution that require different ftp reception. And the Quick-Pack products that require a web service (API). All new integrations should use BIG 14 D04A.

TDT segment specifies the transport code and is specified with code BIG14 while BIG01 / NCP11 version (previous version) are in parentheses. Anyway - the individual IG for each version to be read to verify that this is correct.

TSR segment - it is also stated EDIFACT codes in the document that contains the product and additional services. This applies codes for previous versions of D04A IFTMIN. (NCP11/BIG01).

Everyone must read Appendix 2A - Description for details about each company in Bring and what differences there are per country. The reason for this is that Bring consists of several companies with different TMS systems.

Change log in the pdf document. Appendix2A.
